

FOR IMMEDIATE RELEASE

October 31, 2025  
Nichirei Corporation

Participation in the Japan Responsible Seafood Procurement Roundtable (JRSR)  
~Aiming for the sustainable use of marine resources~

Nichirei Corporation has joined the Responsible Seafood Procurement Roundtable (JRSR), established by Seafood Legacy Inc. on October 2, 2025, with the aim of promoting sustainable seafood procurement.

In recent years, necessity has been growing around the sustainability of seafood products, as well as human rights and environmental issues within global supply chains. Companies are increasingly expected to adopt “responsible procurement” practices. Under our long-term management goal "N-FIT2035," we are working to contribute to the realization of sustainable food procurement and a circular economy.

In sustainable procurement, there are many challenges that are difficult for individual companies to address alone. This roundtable was established to address various issues in seafood procurement through collaboration among companies. Seven seafood-related companies in Japan, including our company, are participating and working to resolve important human rights and environmental issues in the supply chain.

Our company will promote collaboration with participating companies regarding the "responsible procurement" of seafood, which is an important food resource supporting our business activities. We will continue to work with various stakeholders to build a sustainable food procurement and supply chain in the future.
